Private Alpha develops index rule sets and licenses them to banks and asset managers, for example. We would like to point out that Private Alpha receives and seeks licensing income with the Private Alpha indices. All securities are or can be part of the Private Alpha funds and/or certificates.

The category "Innovation Leaders" consists of companies which are leaders, enablers and beneficiaries of disruptive innovation and have thus made it into the Private Alpha Innovation Leaders universe.

Die Caesar's Top Stocks sind nach Aktienuniversum (Growth, Value & Innovation) differenzierte Ranglisten, welche auf dem Private Alpha Trend-Score basieren. Zudem werden jedem Titel drei, den Universen nahestehende Indikatoren hinzugefügt, um die Aktien nochmals granularer filtern zu können.

Indikator	Erklärung bzw. Funktionsweise
Trend Score	Der Trend-Score gibt an, wie hoch der Trend für eine bestimmte Aktie zu einem beliebigen Zeitpunkt ist. Diese Trendbewertung erfolgt mithilfe eines Scoringmodells auf einer Skala von 0-100%.
Gross Margin	Die Bruttomarge setzt das Bruttoergebnis eines Unternehmens ins Verhältnis zum Umsatz. Mithilfe der Bruttomarge kann die Profitabilität des Unternehmens im Zeitverlauf oder im Vergleich zu direkten Wettbewerbern analysiert werden.
EV/Sales	Das Enterprise Value/Sales-Verhältnis setzt den "wahren" Unternehmenswert ins Verhältnis zum Umsatz. So erhält man eine Kennzahl zur Bewertung von Aktien eines Unternehmens - selbst wenn dieses noch keine Gewinne erwirtschaftet.
Rule of 40	Die 40er Regel besagt: das Umsatzwachstum (in %) addiert mit dem Free Cashflow (in %), sollten größer als 40% sein.
PE Ratio	Price/Earnings Ratio bezeichnet das Verhältnis des Aktienkurses zum Gewinn (auch Kurs/Gewinn-Verhältnis = KGV). Damit wird gezeigt, ob eine Aktie teuer oder günstig bewertet ist. Je höher das P/E einer Aktie, desto teurer ist sie.
Dividend Yield	Die Dividendenrendite einer Aktie ist die Dividende je Aktie dividiert durch den Kurs je Aktie.
Debt Ratio	Die Debt to EBITDA Ratio, auch bekannt als "Verschuldungsgrad", ist eine Kennzahl, die ausdrückt, wie schnell ein Unternehmen seine Schulden aus den Betriebserträgen decken könnte.
Earnings Growth	Das Gewinnwachstum (TTM) vergleicht die Summe aller Gewinne eines Unternehmens innerhalb der letzten 12 Monate mit der Summe aller Gewinne der vorherigen 12 Monate. Das langfristige Gewinnwachstum hingegen vergleicht den letzten Jahresgewinn mit dem Jahresgewinn von vor sieben Jahren und annualisiert das durchschnittliche Wachstum.
Revenue Growth	Das Umsatzwachstum (TTM) vergleicht die Summe aller Einnahmen eines Unternehmens innerhalb der letzten 12 Monate mit der Summe aller Einnahmen der vorherigen 12 Monate.
Volatility	Die Volatilität (1 Jahr) beschreibt die täglichen Kursschwankungen eines Wertpapiers über das letzte Jahr. Je höher die Volatilität, desto stärker schwankt der Wert oder Kurs eines Wertpapiers.
Overall Score	Die Gesamtpunktzahl setzt sich zusammen aus den Sternen der drei individuellen Universums-Indikatoren, sowie dem Trendscore der Einzelaktie.
-	Bei einzelnen Titeln kann es vorkommen, dass die benötigten Daten für eine Kennzahl nicht oder unzureichend vorhanden sind. Diese werden mit "-" gekennzeichnet, um sie von "Null Sternen" unterscheiden zu können.
